## **Theory of Global Sustainable Development based on including of microalgae in Bio and Industrial cycles: New Design and Building of Biological System** Dr. Armen B Avagyan

Trends in ecosystems, including the life support, are calling to us that things are out of stability. Therefore, theory focuses on key challenge areas including of climate change, reduction of waste and policy across global supply chains, contains examples of potential products addressing global market niches which appeal to investors, researchers, scientists, and policy makers: biofuel, biopharma, food, feed and perfumery additives areas and joined in collaborative manner through solution-driven discussion in analyses of bottlenecks and problems. The created vision organically runs through the use of the general natural creator of Life conditions – microalgae with considerations to design and operate an environment by development microalgae production system and their biomass processing on an industrial level in a more sustainable manner. The descriptions made on the transition toward a bioeconomy by including microalgae in the Biological and Production Cycles. The theory proves and demonstrates that microalgae must be the key environmental management tool for the new design and building sustainable development of life and strategic heart of Global Life Conserve Industry addressed to approach of a new design and bulding of environment. A truly coherent GHG emission mitigation, waste management and other production policy is ways to bring these traces closer for cost effective manufacturing, well being economy and human health and improving of resource use efficiency. This ensures that the adverse effects of extreme events are minimized or mitigated and that business and industry have a great challenge and opportunity to play a decisive role. Through examination of current strategies being employed, established evidences and the merits of a knowledge-based approach theory provide what measures are required to decision makers who must make choices in the face of risks in order to increase the likelihood of market uptake through expansion of resource efficiency across global supply chains, building products and technology roadmaps, contemporary manufacturing of value added products and can be used to limit the magnitude of future climate change, waste management, bio-energy and improving of human health.

### **From reader reviews:**

#### **Daniele Chambers:**

The book Theory of Global Sustainable Development based on including of microalgae in Bio and Industrial cycles: New Design and Building of Biological System give you a sense of feeling enjoy for your spare time. You may use to make your capable a lot more increase. Book can to become your best friend when you getting strain or having big problem with the subject. If you can make studying a book Theory of Global Sustainable Development based on including of microalgae in Bio and Industrial cycles: New Design and Building of Biological System to get your habit, you can get much more advantages, like add your own personal capable, increase your knowledge about a number of or all subjects. It is possible to know everything if you like start and read a book Theory of Global Sustainable Development based on including of microalgae in Bio and Industrial cycles: New Design and Building of Biological System. Kinds of book are several. It means that, science e-book or encyclopedia or others. So , how do you think about this guide?

#### **Tanya Minor:**

Do you considered one of people who can't read enjoyable if the sentence chained within the straightway, hold on guys this particular aren't like that. This Theory of Global Sustainable Development based on including of microalgae in Bio and Industrial cycles: New Design and Building of Biological System book is readable by simply you who hate the perfect word style. You will find the information here are arrange for enjoyable looking at experience without leaving actually decrease the knowledge that want to give to you. The writer involving Theory of Global Sustainable Development based on including of microalgae in Bio and Industrial cycles: New Design and Building of Biological System content conveys objective easily to understand by many individuals. The printed and e-book are not different in the written content but it just different by means of it. So , do you nevertheless thinking Theory of Global Sustainable Development based on including of microalgae in Bio and Industrial cycles: New Design and Building of Biological System is not loveable to be your top record reading book?

#### **Christine Mata:**

People live in this new day of lifestyle always make an effort to and must have the time or they will get wide range of stress from both day to day life and work. So , if we ask do people have extra time, we will say absolutely sure. People is human not a robot. Then we ask again, what kind of activity do you have when the spare time coming to a person of course your answer will unlimited right. Then do you try this one, reading textbooks. It can be your alternative within spending your spare time, typically the book you have read is Theory of Global Sustainable Development based on including of microalgae in Bio and Industrial cycles: New Design and Building of Biological System.

**Delilah Jordan:**

On this era which is the greater particular person or who has ability in doing something more are more treasured than other. Do you want to become one among it? It is just simple method to have that. What you are related is just spending your time not much but quite enough to experience a look at some books. Among the books in the top collection in your reading list is actually Theory of Global Sustainable Development based on including of microalgae in Bio and Industrial cycles: New Design and Building of Biological System. This book that is certainly qualified as The Hungry Slopes can get you closer in getting precious person. By looking right up and review this book you can get many advantages.
