## **Mathematical Understanding for Secondary Teaching: A Framework and Classroom-Based Situations**

A perennial discussion about teacher development is the optimal content background for teachers. In recent years, that discussion has taken center stage in the work of mathematics education researchers, mathematicians, mathematics professional developers, and mathematics education policymakers. Much of the existing and prior work in this area has been directed toward mathematical knowledge for teaching at the elementary level. The work described in this volume takes a sometimes-neglected approach, focusing on the dynamic nature of mathematical understanding rather than on a stable description of mathematical knowledge, and on mathematics for secondary teaching rather than mathematics for teaching at the elementary level. The work reported in *Mathematical Understanding for Secondary Teaching: A Framework and Classroom-Based Situations* is a practice-based response to the question of what mathematical understandings secondary teachers could productively use in their teaching. For each of more than 50 events, our team of almost 50 mathematics educators who were experienced mathematics teachers developed descriptions of the mathematics that teachers could use—each of those descriptions (consisting of the event and the mathematics related to the event) is what we call a Situation. We developed our Framework for Mathematical Understanding for Secondary Teaching (MUST) based on an analysis of our entire set of Situations. We call the work practice-based because the MUST framework is based on actual events that we witnessed in our observations of secondary mathematics practice. Groups of mathematics teachers can use this volume to enhance their own understandings of secondary mathematics. School leaders and professional developers in secondary mathematics will find our MUST Framework and Situations useful as they work with teachers in enhancing and deepening their understanding of secondary mathematics. Mathematics teacher educators and mathematicians who teach mathematics to prospective and in-service secondary teachers will be able to couch their mathematical discussions in the Situations—examples that arise from secondary mathematics classrooms. They will be able to use this volume as they design courses and programs that enhance mathematics from the perspectives identified in the MUST framework. Policymakers and researchers can use our MUST framework as they consider the mathematics background needed by teachers.

### **From reader reviews:**

#### **Peter Tesch:**

What do you consider book? It is just for students because they're still students or this for all people in the world, what best subject for that? Just simply you can be answered for that concern above. Every person has various personality and hobby for every single other. Don't to be compelled someone or something that they don't would like do that. You must know how great in addition to important the book Mathematical Understanding for Secondary Teaching: A Framework and Classroom-Based Situations. All type of book would you see on many resources. You can look for the internet options or other social media.

#### **Carolyn Lutz:**

Nowadays reading books become more than want or need but also be a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The data you get based on what kind of book you read, if you want get more knowledge just go with training books but if you want truly feel happy read one having theme for entertaining including comic or novel. The particular Mathematical Understanding for Secondary Teaching: A Framework and Classroom-Based Situations is kind of book which is giving the reader capricious experience.

#### **Joy Rodriguez:**

What is your hobby? Have you heard this question when you got students? We believe that that query was given by teacher to their students. Many kinds of hobby, All people has different hobby. And also you know that little person just like reading or as looking at become their hobby. You need to know that reading is very important in addition to book as to be the issue. Book is important thing to increase you knowledge, except your teacher or lecturer. You find good news or update about something by book. Different categories of books that can you decide to try be your object. One of them is this Mathematical Understanding for Secondary Teaching: A Framework and Classroom-Based Situations.

#### **Nila Cobb:**

Reading a publication make you to get more knowledge from this. You can take knowledge and information from your book. Book is written or printed or descriptive from each source that filled update of news. Within this modern era like right now, many ways to get information are available for anyone. From media social just like newspaper, magazines, science book, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just in search of the Mathematical Understanding for Secondary Teaching: A Framework and Classroom-Based Situations when you required it?
