"The Cosmic Frontier" is, above all, the story of the rise of the extra-constitutional power structures that is threatening to disintegrate the 200 years old American "democratic experiment".

In his sweeping research Mauro F. P. Porto draws from hundreds of pages of official documents and stunning images (wholly reproduced in the accompanying CD) to present a credible account of the origin of a truly "subterranean" defense establishment, developed throughout the last 50 years in the USA, destined to keep as far as possible under control the social, economic and, mainly, the military-political consequences of the indisputable proof, obtained by the US government, that extraterrestrial beings of humanoid appearance have been present for untold times on Earth.

The book presents a surprisingly convincing demonstration of the manner how the acquisition of near absolute military-industrial hegemony by the USA during the second half of the 20th century is intimately related to the accidental contact the American Army had with extraterrestrials, near Roswell AFB, New Mexico, in 1947.
