NOTE: You are purchasing a standalone product; MasteringChemistry does not come packaged with this content. If you would like to purchase both the physical text and **MasteringChemistry** search for ISBN-10: **0321839765**/ISBN-13: **9780321839763**. That package includes ISBN-10: **0133871975** /ISBN-13: **9780133871975** and ISBN-10: **0321839927**/ISBN-13: **9780321839923**.

For one or two semester biochemistry courses (science majors).

A highly visual, precise and fresh approach to guide today's mixed-science majors to a deeper understanding of biochemistry

Biochemistry: Concepts and Connections engages students in the rapidly evolving field of biochemistry, better preparing them for the challenges of 21st century science through quantitative reasoning skills and a rich, chemical perspective on biological processes.

This concise first edition teaches mixed-science-majors the chemical logic underlying the mechanisms, pathways, and processes in living cells through groundbreaking biochemical art and a clear narrative that illustrates biochemistry's relation to all other life sciences. Integration of biochemistry's experimental underpinnings alongside the presentation of modern techniques encourages students to appreciate and consider how their understanding of biochemistry can and will contribute to solving problems in medicine, agricultural sciences, environmental sciences, and forensics.

The text is fully integrated with MasteringChemistry to provide support for students before, during, and after class. Highlights include interactive animations and tutorials based on the textbook's biochemical art program and Foundation Figures to help students visualize complex processes, apply, and test conceptual understanding as well as quantitative reasoning.

Also available with MasteringChemistry[®]

MasteringChemistry from Pearson is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students before, during, and after class with powerful content. Instructors ensure students arrive prepared by assigning interaction with relevant biochemical concepts before class, and encourage critical thinking, visualization, and retention with in-class resources such as Learning Catalytics[™]. Students can further master concepts after class by interacting with biochemistry animations, problem sets, and tutorial assignments that provide hints and answer-specific feedback. The Mastering gradebook records scores for all automatically graded assignments in one place, while diagnostic tools give instructors access to rich data to assess student understanding and misconceptions.

Mastering brings learning full circle by continuously adapting to each student and making learning more personal than ever—before, during, and after class.

From reader reviews:

Robert Young:

Nowadays reading books become more than want or need but also turn into a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want send more knowledge just go with education and learning books but if you want sense happy read one along with theme for entertaining including comic or novel. Typically the Biochemistry: Concepts and Connections is kind of guide which is giving the reader unforeseen experience.

William Ward:

A lot of people always spent all their free time to vacation or maybe go to the outside with them family or their friend. Do you realize? Many a lot of people spent that they free time just watching TV, or even playing video games all day long. If you wish to try to find a new activity this is look different you can read the book. It is really fun for you. If you enjoy the book that you just read you can spent 24 hours a day to reading a guide. The book Biochemistry: Concepts and Connections it is rather good to read. There are a lot of people that recommended this book. They were enjoying reading this book. When you did not have enough space to bring this book you can buy the actual e-book. You can m0ore quickly to read this book from your smart phone. The price is not too expensive but this book offers high quality.

Angie Blakney:

People live in this new morning of lifestyle always make an effort to and must have the free time or they will get great deal of stress from both everyday life and work. So , whenever we ask do people have spare time, we will say absolutely yes. People is human not really a huge robot. Then we request again, what kind of activity are there when the spare time coming to anyone of course your answer can unlimited right. Then do you try this one, reading guides. It can be your alternative with spending your spare time, the book you have read is Biochemistry: Concepts and Connections.

James Pitts:

Do you have something that that suits you such as book? The book lovers usually prefer to select book like comic, small story and the biggest the first is novel. Now, why not striving Biochemistry: Concepts and Connections that give your fun preference will be satisfied by means of reading this book. Reading practice all over the world can be said as the opportunity for people to know world better then how they react in the direction of the world. It can't be explained constantly that reading behavior only for the geeky person but for all of you who wants to possibly be success person. So , for every you who want to start looking at as your good habit, you could pick Biochemistry: Concepts and Connections become your starter.
