Z-80 Microprocessor: Architecture, Interfacing, Programming, and Design (3rd Edition) Ramesh M. Gaonkar

This text is intended for microprocessor courses at the undergraduate level in technology, engineering, and computer science. Now in its third edition, it provides a comprehensive treatment of the microprocessor, covering both hardware and software based on the Z80 microprocessor family. This edition preserves the focus of the earlier editions and includes the following changes: * Chapters have been revised to include the most recent technological changes in 32- and 64-bit microprocessors and 8-bit microcontrollers. * Several illustrative programs have been added throughout the text. * Complete data sheets for the LM 135 temperature sensor and LCD panel, and a complete list of Z80 instructions with machine cycles, T-states, and flags are included in the Appendixes. * Appendix G, which contains answers to selected questions, has been added.
