Reforming the Financial Sector in Central European Countries (Studies in Economic Transition)

Reforming the Financial Sector in Central European Countries (Studies in Economic Transition)

The analysis in this book reflects various aspects of financial sector transformation in selected Central European countries that are expected to join the EU in 2004. The authors are Central European financial experts who provide, among other things, a detailed overview of the following main topics: Banking Regulation and Supervision; Concentration and Efficiency of the Banking Sectors; Financial (banking) crises in selected Central European countries; and Monetary and Exchange Rate Development. The results of the research done by these authors reflect an interesting fact: that there exist important differences in the financial sector development even in the relatively homogeneous group of selected Central European countries, namely the Czech Republic, Poland, Slovakia and Hungary.
