# Building and Using Comparable Corpora (Theory and Applications of Natural Language Processing)

## Building and Using Comparable Corpora (Theory and Applications of Natural Language Processing)

The 1990s saw a paradigm change in the use of corpus-driven methods in NLP. In the field of multilingual NLP (such as machine translation and terminology mining) this implied the use of parallel corpora. However, parallel resources are relatively scarce: many more texts are produced daily by native speakers of any given language than translated. This situation resulted in a natural drive towards the use of comparable corpora, i.e. non-parallel texts in the same domain or genre. Nevertheless, this research direction has not produced a single authoritative source suitable for researchers and students coming to the field.

The proposed volume provides a reference source, identifying the state of the art in the field as well as future trends. The book is intended for specialists and students in natural language processing, machine translation and computer-assisted translation.

### **From reader reviews:**

#### **Lynn Kelley:**

With other case, little individuals like to read book Building and Using Comparable Corpora (Theory and Applications of Natural Language Processing). You can choose the best book if you'd prefer reading a book. So long as we know about how is important a book Building and Using Comparable Corpora (Theory and Applications of Natural Language Processing). You can add understanding and of course you can around the world with a book. Absolutely right, mainly because from book you can understand everything! From your country right up until foreign or abroad you will find yourself known. About simple point until wonderful thing it is possible to know that. In this era, you can open a book or maybe searching by internet device. It is called e-book. You need to use it when you feel bored to go to the library. Let's read.

#### **Gregory Phipps:**

Here thing why that Building and Using Comparable Corpora (Theory and Applications of Natural Language Processing) are different and trustworthy to be yours. First of all looking at a book is good nonetheless it depends in the content of computer which is the content is as scrumptious as food or not. Building and Using Comparable Corpora (Theory and Applications of Natural Language Processing) giving you information deeper and in different ways, you can find any publication out there but there is no reserve that similar with Building and Using Comparable Corpora (Theory and Applications of Natural Language Processing). It gives you thrill studying journey, its open up your current eyes about the thing that happened in the world which is probably can be happened around you. You can actually bring everywhere like in park, café, or even in your way home by train. In case you are having difficulties in bringing the published book maybe the form of Building and Using Comparable Corpora (Theory and Applications of Natural Language Processing) in e-book can be your option.

#### **Rachel Chaney:**

The ability that you get from Building and Using Comparable Corpora (Theory and Applications of Natural Language Processing) may be the more deep you rooting the information that hide in the words the more you get considering reading it. It doesn't mean that this book is hard to know but Building and Using Comparable Corpora (Theory and Applications of Natural Language Processing) giving you buzz feeling of reading. The author conveys their point in particular way that can be understood by anyone who read it because the author of this guide is well-known enough. This specific book also makes your vocabulary increase well. So it is easy to understand then can go with you, both in printed or e-book style are available. We highly recommend you for having this kind of Building and Using Comparable Corpora (Theory and Applications of Natural Language Processing) instantly.

#### **Linda Harris:**

You are able to spend your free time to learn this book this reserve. This Building and Using Comparable

Corpora (Theory and Applications of Natural Language Processing) is simple bringing you can read it in the recreation area, in the beach, train in addition to soon. If you did not have got much space to bring the particular printed book, you can buy the particular e-book. It is make you much easier to read it. You can save typically the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.
