Flat and Curved Space-Times

George F. R. Ellis, Ruth M. Williams

Flat and Curved Space-Times George F. R. Ellis, Ruth M. Williams

This text explains special relativity and the foundations of general relativity theory in terms understandable to undergraduates in mathematics and physics coming to the subject for the first time. Space-time geometry is emphasized throughout, providing a basic understanding of the special relativity effects of time dilation, length contraction, and the relativity of simultaneity. Bondi's k-calculus is introduced as a simple means of calculating the magnitudes of these effects, and this leads to a derivation of the Lorentz Transformation as a way of unifying these results. The invariant interval of flat space-time is compared to that of curved space-times, and the basic properties of simple cosmological models are presented. Appendices enable the advanced student to master the application of four tensors to the relativistic study of energy, momentum and electromagnetism.

From reader reviews:

Andrew Meadows:

Information is provisions for those to get better life, information currently can get by anyone in everywhere. The information can be a knowledge or any news even a concern. What people must be consider when those information which is in the former life are difficult to be find than now could be taking seriously which one would work to believe or which one often the resource are convinced. If you obtain the unstable resource then you obtain it as your main information there will be huge disadvantage for you. All of those possibilities will not happen with you if you take Flat and Curved Space-Times as your daily resource information.

Hilton Rogers:

Your reading 6th sense will not betray a person, why because this Flat and Curved Space-Times reserve written by well-known writer we are excited for well how to make book that could be understand by anyone who have read the book. Written within good manner for you, dripping every ideas and publishing skill only for eliminate your current hunger then you still hesitation Flat and Curved Space-Times as good book not merely by the cover but also with the content. This is one book that can break don't evaluate book by its cover, so do you still needing a different sixth sense to pick this kind of!? Oh come on your reading through sixth sense already told you so why you have to listening to a different sixth sense.

Jeannette Villalobos:

Don't be worry if you are afraid that this book may filled the space in your house, you could have it in e-book method, more simple and reachable. This specific Flat and Curved Space-Times can give you a lot of buddies because by you looking at this one book you have issue that they don't and make an individual more like an interesting person. This kind of book can be one of a step for you to get success. This book offer you information that probably your friend doesn't understand, by knowing more than additional make you to be great people. So , why hesitate? We should have Flat and Curved Space-Times.

Debra Davin:

A lot of publication has printed but it is unique. You can get it by net on social media. You can choose the best book for you, science, comedian, novel, or whatever by searching from it. It is referred to as of book Flat and Curved Space-Times. You can add your knowledge by it. Without leaving behind the printed book, it could possibly add your knowledge and make a person happier to read. It is most critical that, you must aware about reserve. It can bring you from one destination to other place.
