Inflation Nation: Wise Investing in a Foolish Age CFA, CPA Tom Cammack

Is the global financial crisis really over? Government bailouts and deficit spending programs have not solved anything; they have only pushed problems into the future. The U.S. government and other governments around the world have saddled their citizens and future generations with debts that cannot possibly be repaid. At least not with honest money. And that is why inflation is coming. The debts can only be repaid with a depreciated currency. This book provides a concise explanation of how America got here and where we are headed. Stagflation will return, gold will likely go to \$5,000 per ounce or more, and there is a good possibility we will experience another great depression. Practical advice is provided in the Inflation Survival Guide (Section III) to help readers save and invest wisely now.
